Fourth Decade 2000-2009

Main Papers:

Analysis of Granular Pile-Mat System for Soils with Stiff Crust
by J.T. Shahu, M.R. Madhav and S. Hayashi .................................................. 1

Application of Timoshenko Beam Theory to Modeling Geosynthetic-Reinforced Granular Base
over Soft Ground
by J.H. Yin ........................................................................................................ 17

Characterization of Asphalt Concrete for its Use as Landfill Liners
by J.S. Chen and L.S. Huang ................................................................................. 29

Pullout and Direct Shear Resistance of Hexagonal Wire Mesh Reinforcement in Weathered
Bangkok Clay
by P. Vootipruex, D.T. Bergado and P. Ounjaichon ..................................................... 43

Technical Note:

Shear Wave Velocity and SPT-N Values of In-Situ Reclaimed Soil in West Taiwan
by L.K. Chien, M.C. Lin and Y.N. Oh ........................................................................ 63

Discussion:

On Large-Scale Laboratory Pullout Testing
by C. Ghosh .......................................................................................................... 79

Closure:

by D.M. Raju, S.C.R. Lo, M. Gopalan and J. Gao ...................................................... 81

Main Papers:

Downward Settlement of a Single Floating Pile
by W.H. Ting ......................................................................................................... 83

Undrained Shear Strength of the Singapore Marine Clay at Changi from In-Situ Tests
by Bo Myint Win, M.F. Chang, A. Arulrajah and V. Choo ......................................... 91

Numerical Modeling of Prefabricated Vertical Drain
by D.G. Lin, H.K. Kim and A.S. Balasubramaniam ............................................... 109

Vibration Characteristics of Roads Constructed on Soft Clay
by K. Kogo, N. Miura and K. Itoh .......................................................................... 127

Limit Equilibrium Analysis of the Cherry Hills Slide
by S.F. Reyes ......................................................................................................... 141

Technical Note:

Strong Ground Motions Recorded in Indonesia
by H. Hao ........................................................................................................... 151
Characterization of Components of Shear Strength
by W.H. Ting .................................................................................................................. 165

Measured and Predicted Axial Response of Piles with Diameter Discontinuities
by K.J. Xu and H.G. Poulos .......................................................................................... 171

Parametric FE Analysis on the Behaviour of Bangkok Clay Underneath Test Embankment at Nong
Ngoo Hao
by S.B. Tamrakar, S. Shibuya and T. Mitachi ................................................................. 193

Behaviour of Granular Piles under Compressive and Tensile Loads
by G. Ranjan and P. Kumar .......................................................................................... 209

Technical Note:

Effect of Height and Diameter Ratio on Strength of Cement Stabilized Soft Bangkok Clay
by K. Peitchgate, P. Vootipruex and W. Sukmongkol ................................................... 227
### Main Papers:

- **Characterization of Residual Soils in Singapore**  
  *by Karr Winn, H. Rahardjo and S.C. Peng*  
  p. 1

- **Segmental Unloading Point Method for Interpretation of Some Static Tests on Shafts**  
  *by S.S. Lin, S.C. Yeh, C.H. Juang and Y.H. Chang*  
  p. 15

- **A Refined Elastic Visco-Plastic Model for Clayey Soils**  
  *by J.H. Yin*  
  p. 23

### Technical Notes:

- **Displacement Behavior of Wrapped-Reinforced Wall Subjected to Cyclic Loading**  
  *by G.L. Yang and Y.H. Wang*  
  p. 33

- **Effects of Pozzolanic Wastes on Strength Development of Compacted Clay**  
  *by S. Asvanipisit, N. Tanpatboonkul, P. Jenwittayawetchakun and W. Sungworupsatkul*  
  p. 37

### Errata:

- **Undrained Shear Strength of the Singapore Marine Clay at Changi from In-situ Tests**  
  *by Bo Myint Win, M.F. Chang, A. Arulrajah and V. Choa*  
  p. 43

### Discussion:

- **Downdrag Settlement of a Single Floating Pile**  
  *by B.H. Fellenius*  
  p. 45

### Closure:

- **by W.H. Ting**  
  p. 47

### Main Papers:

- **Evaluating Ageing Effects of Natural Clays**  
  *by S. Shibuya, T. Mitaichi and M. Temma*  
  p. 53

- **Dynamic Properties of Hydraulic Reclaimed Soil under Initial Shear Stress**  
  *by L.K. Chien and Y.N. Oh*  
  p. 59

- **A New Indirect Tensile Strength Measuring Device for Weak Rock**  
  *by H. Omar and M.S. Salisdu*  
  p. 75

### Technical Notes:

- **A Constitutive Model for Anisotropic and Small Strain Conditions**  
  *by J.Y. Shi, F.H. Lee and P.T. Chong*  
  p. 83

- **Determination of the Kern of a Spread Foundation**  
  *by A. Man Chiu Au*  
  p. 91

- **The Influence of Discontinuities in Rock Blasting**  
  *by M.K. Hashim, S. Sulaiman and M.R. Selamat*  
  p. 101

Announcement:
Papers_2002

Main Papers:

Genetic Algorithm-Based Optimum Design of Piled Raft Foundations with Model Tests
by H.T. Kim, H.K. Yoo and I.K. Kang

3-D Deformation Analysis of Earth Pressure Balance Shield Tunnelling in Bangkok Subsoil
by D.G. Lin, C.T. Tseng, N.Phiawan and S. Suwansawat

Shear Modulus Characterization of Bangkok Clay by In-Situ Tests and Borehole Data
by W. Sramon, S. Shibuya and H. Toyota

Technical Note:

A Review of Local Strain Measurement Systems for Triaxial Testing of Soils
by S. Yimsiri and K. Soga

Main Papers:

An Anisotropic Hardening Constitutive Model for the Nonlinear FE Analysis of Rapidly
Built Embankment on Soft Clays
by S. Oh

Loading Rate Effects on the Bearing Capacity of Shallow Footings on Clays
by M.A. Al-Shamrani

Effects of Intermediate Principal Stress on the Displacement around Tunnels
in Visco-Elastoplastic Rock
by Y. Xiaoli, Y. Lirong, L. Liang and L. Baochen

Technical Note:

Stabilization of an Expansive Artificial Clay Mixture with C/F Type Fly Ash and Sand
by E. Cokca and D. Turkler

Main Papers:

Statistical Analyses of RQD versus Initial Damage Relationship of Singapore Granite
by C. Wu and H. Hao

Performance Evaluations of Landfill Cover Systems with Sludge Barriers
by M. Kamo, S. Inazumi and T. Katsuki

The Effect of Humic Acid and Salt Concentration in Ariake Clay on Its Stabilization
by K. Onitsuka, C. Modinolius, M. Kamo and T. Negami

Technical Notes:

Blast Optimization in Quarries
by S. Tangchawal

Potential of Rock Flour for Use in Reinforced Soil Construction
by C.N.V.S. Reddy and N.V.R. Moorthy

A New Facility for Measurement of Earth Pressure At-rest
by T.J. Chen and Y.S. Fang
Papers_2003

Main Papers:

Laterally Loaded Pile Bents in Marine Clay
by V.S.T. Ramakrishna and S. Narashima Rao ........................................ 1

Negative Skin Friction on Piles Due to Lowering of Groundwater Table
by C.J. Lee and C.R. Chen ........................................................................... 13

On Methods for Interpreting Bearing Capacity from a Pile Load Test
by J.H. Hwang, J.C.C. Li and N. Liang ......................................................... 27

Quantitative Evaluation of Corner Effect on Deformation Behavior of Multi-Strutted
Deep Excavation in Bangkok Subsoil
by D.G. Lin, T.C. Chung and N. Phien-veau ............................................. 41

Prediction of Pullout Capacity Using Hexagonal Wire Mesh Reinforcement
and Sand Backfill
by C. Teerawattanasuk and D.T. Bergado ................................................. 59

Main Papers:

Determination of OCR for Old Alluvium Soil Using Direct Simple Shear Tests
by J. Chu, P.P. Goh and S.C. Pek ................................................................. 79

Mechanical Behavior of Vertical Excavated Nailed Walls
by Y.S. Hong, C.S. Wu and R.H. Chen ..................................................... 87

Pullout and Direct Shear Resistances of Hexagonal Wire Mesh Reinforcement
in Various Types of Backfill Soils
by P. Voostipruex and D.T. Bergado ....................................................... 101

Response Prediction for Horizontally Loaded Pile Groups
By E.M. Comodromos ............................................................................... 123

Technical Note:

A Case of Pile Socket Capacity and Rock Mass Classification
by W.H. Ting and N. Fund ........................................................................ 135

Main Papers:

Numerical Study of Piled Pavement Responses
by S. C. Wong and H. G. Poulos ................................................................ 149

A Model Study of EPS Constructed Bridge Approach Embankment
by J. S. Yang, S. W. Huang and M. C. Wang ............................................. 161

Characteristics of Ground Movements in Deep Excavations with Concrete
Diaphragm Walls in Bangkok Soils and their Prediction
by N. Phien-veau and C. H. Gan ............................................................... 167

Closely Spaced Strip Footings on Reinforced Sand
by A. Kumar and S. Saran ........................................................................ 177

Development of Slope Stability Analysis Incorporating Ground Vibrations
by M. R. Selamat and G. P. Chitombo ..................................................... 187
Papers 2004

Main Papers:

Measurement of Shear Modulus of Soil using Bender Elements
by T.C. Kung, C.Y. Ou and P.G. Hsieh ................................................. 1

Numerical Study of Two Braced Excavations in Singapore Marine Clay
by S.A. Tan and R.Y. Tan ....................................................................... 9

Consolidation Analyses of Soils Underneath Haarajoki Test Embankment
Using Elastic-Plastic and Elastic Visco-Plastic Model
by C. Zhou and J.H. Yin ...................................................................... 29

Improvement of Soft Ground by Dynamic Compaction

Technical Notes:

Engineering Properties of Some Hardened Fly Ashes
by S. Shibuya, T. Mitachi and T. Kawaguchi ......................................... 47

Main Papers:

A Failure Criterion for Mu-San Sandstone Based on Hollow Cylinder Tests

Natural Attenuation Mechanism of Heavy Metals in Compacted Soils:
Case Study from South Wales, United Kingdom
by W.Y.W. Zubatry and B.K. Tan ............................................................ 61

Stability Evaluations of Landslides at Rock Slopes Around Dam Reservoirs in
Consideration of Seepage Pressures
by I. Nakamura, H. Ohtsu and Y. Ohnishi ............................................... 67

Determination of Displacement-Related Passive Earth Pressure
by K.S. Subba Rao, S. Nayak and D. Choudhury ..................................... 79

Technical Notes:

Analytical Assessment of Non-Linear Wave-Induced Seabed Response
by D.-S. Jeng, T.L. Lee, I.K. Chien, M.S. Rahman and Y.N. Oh................. 87
Main Papers:

Influence of Lateral Restraint on the Swelling Behavior of Expansive Soils
by M. A. Al-Shamrani ................................................................. 101

Natural Cementation of Singapore Clay
by S. Shibuya, D.J. Li, T. Mitachi and T. Kawaguchi ................................................. 113

Piezocone Dissipation Testing of Singapore Marine Clay at Changi
by A. Arulrajah, M.W. Bo, H. Nikraz and R. Hashim ..................................................... 119

Technical Notes:

Experimental Behavior of Soft Clays Along Unloading Stress Paths
by R. Zhang and S. Chen ................................................................. 127

Investigation on Compressibility of High Moisture Content Soil with Hydraulic Consolidation Cell
by M.W. Bo, K.S. Wong and V. Choa .......................................................... 133

An Empirical Method for Controlling the Swell Potential of Compacted Soils
by H. Tostun ..................................................................................... 141
Papers_2005

Main Papers:

Simulation of Soft Clay Deformation Behind Diaphragm Wall by Linear Equalization, FEM Method
by S. Shibuya and S.B. Tamrakar .............................................. 1

Liquefaction Resistance in Seabed Sand under Different Loading Periods

Technical Note:

Vacuum and Surcharge Combined Axi-Symmetric Consolidation of Soft Clayey Soils
by A. H. Mulfone, H.L. Liu, Y. Gao and J.C. Liu .................................. 25

Effects of Construction of Underground Mass Raid Transit on Nearby Piled-Structures
by K. Y. Yong and C. H. Pang .................................................. 37

The Influence of Construction “Side Effects” on Existing Pile Foundations
by H. G. Poulos ................................................................. 51

Tan Swan Beng Award Recipient:

Prediction of Differential Settlement of Buildings Induced by Land Subsidence from Deep Well Pumping
by N. Phienwej, S. Thepparad and P.H. Giao ..................................... 69

Tan Swan Beng Award Nominees:

Consolidation Settlement of Reinforced Embankment on Deep Mixing Cement Piles
by D. T. Bergado, G. A. Lorenzo and T. Duangchana .......................... 77

A Design Approach for Piled Raft with Short Friction Piles for Low Rise Buildings on Very Soft Clay
by Y.C. Tan, C.M. Chew and S.S. Gwe .......................................... 85

Simulation of Stress-Strain Curve Under Undrained Condition
with Small Strain Stiffness of Clay Considered
by F. G. Heisch, T. C. Kueh and C. Y. Oh ..................................... 91

Main Papers:

Thermal Conductivity and Fabric Anisotropy of Saturated Clays
by H.M. Abcouck-Nage and D.T. Bergado ...................................... 99

Immediate Settlement of a Rectangular Foundations Embedded in a Saturated Isotropic Elastic Soil
by G.X. Mei, J.H. Yin, J.M. Zai and G.F. Zhu .................................. 109

A Study on Swell Pressure and Development of a Modified Oedometer
by V.R. Murthy and P.H. Krishna ................................................ 115

Modification and Stabilization of Malaysian Cohesive Soils with Lime
by K.A. Kassim, R. Hamir and K.C. Kok ....................................... 123

Technical Note:

Response of Inextensible Reinforcement to Transverse Displacement/Pull
by M.R. Maihur and B. Umashankar .............................................. 133

Effect of Soil Movements Due to Excavation on Piled Foundations
Main Papers:

Risk Evaluation of Slope Failure Induced by Rainfall using the Simplified Storage Tank Model
by H. Ohtsu, S. Janrunsaotai, K. Takahashi, N. Supawiwat and Y. Ohnishi ........................................ 157

Studies on Pullout Behaviour of Pile Anchors under Oblique Loading
by S. Narasimha Rao, K. Hemalatha and S. Surendran ................................................................. 165

Studies on Underreamed Piles in Expansive Soils by Thermal Analogy
by N.P. Kurian and G. Sridasakshi ................................................................. 173

Technical Note:

A Simplified Approach of Stability Analysis for Nailed Earth Slopes
by Y.S. Hong and C.S. Wu ................................................................. 185

Significance of Fabric Deformation Shape at Subgrade in Design of Reinforced Flexible Pavements
by C.N.V. Satyanarayana Reddy and N.V. Rama Moorthy ................................................................. 195
Main Papers:

Numerical Study of a Nailed Slope Excavation
by M.W. Gu and C.W.W. Ng ................................................................. 1

Wave Velocities and Their Relation to Fabric Anisotropy during the Shearing of Sands
by C.J. Lee and H.Y. Huang ................................................................. 13

Influence of Intermediate Principal Stress on Strength and Modulus of Rock Mass
by R.P. Tiwari and K.S. Rao .................................................................. 29

Effect of Random Variable Models on Asset Management of Road Slopes
by N. Supawiwat, H. Ohtsu, K. Takahashi and Y. Ohnishi ................................................................. 43

Long-Term Observations of Consolidation Processes-Results from about Fifty Years’ Monitoring of Swedish Test Embankments on Soft Clay
by R. Larsson ......................................................................................... 53

Main Papers:

DEM Analysis of Soil-Pipeline Interaction in Sand Under Lateral and Upward Movements at Deep Embedment
by S. Yimsiri and K. Soga ........................................................................ 83

Influence of Salt Additive in Lime Stabilization on Organic Clay
by S. Kostant, K. Onitsuka and T. Negami ......................................................... 95

Determination of Partitioning and Dispersion Coefficient Using Column Tests
by M.A. Tanchuling, J. Takemura, M.R.A. Khan and O. Kasakabe ......................................................... 103

Scale Effect on Fracture Mechanisms of Non-Persistent Rock Joints Under Uniaxial Loading
by O. Maghida and I. Khawaldeh ................................................................. 111

Consolidation Behavior of Reconstituted Bangkok Clay
by B. Uhrichou, T.H. Seah, Y. Budsayaplakorn and P. Lukkunprasit ................................................................. 121

Technical Note:

Modelling Liquefaction of Sand in a Geotechnica Centrifuge
by P.P. Bartke, S. Raghunandan and D.N. Singh ................................................................. 131
Special Issue: Geotechnical Engineering in the Development of Suvarnabhumi International Airport, Bangkok, Thailand

Geotechnical History of the Development of the Suvarnabhumi International Airport
by Z.C. Moh and P.C. Lin ................................................................. 143

Numerical Analyses of PVD Improved Ground at Reference Section of Second Bangkok International Airport
by D.G. Lin, W.T. Liu and P.C. Lin ...................................................... 157

Design and Construction of Ground Improvement Works at Suvarnabhumi Airport
by T.H. Sah ................................................................. 171

PVD Ground Improvement with Vacuum Preloading at Suvarnabhumi Airport
by N.G. Corstleve, G.T. Visser and T.P. de Zwart ........................................ 189

Construction Control and Management of Ground Improvement of Airside Pavements
by P.C. Lin, S. Koslanami and Z.C. Moh ......................................... 195

Bored Piles and Bi-Directional Load Tests
by S. Batling ................................................................. 207
Papers - 2007

Main Papers:

Permeation Grouting in Sandy Soils: Prediction of Injection Rate and Injection Shape
by M.K. Uddin ................................................................. 1

Formula of Pile-Soil Stress Ratio in Pile-Net Composite Ground
by L.R. Xu, D.W. Lu, J.D. Niu .............................................. 8

Performance of Caisson in Soft Clay Under Cyclic Lateral Loading
by N.D. Kumar, S.N. Rao and V.Sundar .................................. 16

Technical Note:

Bearing Capacity Tests of Square Footings on Reinforced Layered Soil
by A. Kumar, S. Raghubhandan and D.N. Singh ................................... 24

Bearing Capacity of Strip Footings on Reinforced Layered Soil
by A. Kumar, M.L. Ohri, and R.K. Bawa ......................................... 33

Main Papers:

Sliding Stiffness of Foundations Embedded into an Elastic Stratum
by P. Vijayan, S. Chandrasekar and N. Ganesan ................................ 37

Coupled Tank Model and Flow Model for Slope Seepage Flow Analysis
by R. Ramal, Y. Ohnishi and S. Nishiyama ..................................... 51

Pressure Settlement Characteristics of Square Footings on Reinforced Layered Soil
by A. Kumar, B.S. Walia and S. Saran ............................................ 57

Influence of Intermediate Principal Stress on Strength and Modulus of Rock Mass
by R.P. Tiwari and K.S. Rao ....................................................... 65

Impacts of Acid Treatment Practice on Geo-Environmental Conditions in the Ariake Sea, Japan
by M.A. Moqsud, S. Hayashi, T.J. Du and D. Suetsugu ................................ 79

Utilizations of Incineration Ash from Municipal Solid Waste as Admixtures for Road Construction Materials
by G.F. Ma, K. Onitsuka and T. Negami ......................................... 87

Technical Note:

Calcareous Aeolinite Soil Stabilisation with Lime - Fly Ash Mix
by H. Nikraz and M. Soomro ................................................... 95

An Improved Simple Graphical Method of Estimating the Time and Strain at the end of the “Primary” Consolidation of a Clayey Soil with Non-linear Creep
by C.M. Cheng and J.H. Yin .................................................... 105

Ground Movements in EPB Shield Tunnelling at Crossings underneath Existing Water Tunnels in Bangkok Subsoils
by D. Luangritaksanchalop ....................................................... 111
Main Papers:

Lessons Learned from Recent MRT Construction Failures in Asia Pacific  
by Z. C. Moh and R. N. Hwang  
................................................................................................................................. 121

Collapse of Nicoll Highway – A Global Failure at the Curved Section of a Cut-and-Cover Tunnel Construction  
by K. Y. Yong and S. L. Lee  
................................................................................................................................. 139

Geomaterial Characterization in Simulating the Performance of Large Dams under Construction  
by H. Ohta, H. Yoshikoshi, Y. Uchita, T. Ishiguro and Y. Hayashi  
................................................................................................................................. 155

Issues in Evaluating Capacity of Rock Socket Foundations  
by F. H. Kalawaw and W. A. Prakoso  
................................................................................................................................. 169

Effects of Aging Process and Viscous Nature on Strength and Deformation Characteristics of Very Soft Marine Bangkok Clays  
by S. Sambhandharakau  
................................................................................................................................. 181

Thermo-mechanical Behavior and Stabilization of Soft Bangkok Clay  
by D. T. Bergado and H. M. Abuel-Naga  
................................................................................................................................. 199

Challenges in Ground Improvement Techniques for Extreme Conditions: Concept and Performance  
by S. Varaktin and K. Yee  
................................................................................................................................. 219

Interpretation and Analysis of Test Embankments in Soft Clays with and without Ground Improvement  
by A. S. Balasubramaniam, M. Huang, M. Bolton, E.Y.N. Oh,  
D. T. Bergado and N. Phienwej  
................................................................................................................................. 235

Challenges in Slope Engineering in Hong Kong  
by R. K. S. Chan  
................................................................................................................................. 255

The Role of Debris Flow in Hazardous Ground Movement  
by W. H. Ting and Z. C. Moh  
................................................................................................................................. 273
Papers_2008

Main Papers:

Analysis of Diaphragm Wall Displacement due to Jet Grouting in Clay
by H. D. Lin and S. C. Lin ................................................................. 1

Effects of Tip Grouting on Capacity of Shafts Socket in Gravel Layer

Environmental Designs for Vertical Cutoff Walls in Coastal Landfill Sites
by S. Inazumi, M. Kimura and M. Kamon ....................................... 19

Numerical Simulation Using Disturbed State Concept (DSC) Model for Softening Behavior of Sand
by N. H. Mok, K. Suzuki, M. Oka, T. Tsubai and C. S. Decei ............... 25

Influence of Uncertainty in Soil Parameters to Factor of Safety along Mekong Riverbank
by S. Thongchuen, V. Soosriatra and S. Soralump ............................ 37

Errata: .................................................................................................. 49

Republished Paper:

Issues in Evaluating Capacity of Rock Socket Foundations
by F. H. Kalaway and W. A. Prakoso .................................................. 51

Main Papers:

Performance of PVD and Surcharging in Reclamation Works for a Power Plant in Negeri Sembilan, Malaysia
by S. Krishnan, T. Nakamishi and A. H. Goh ..................................... 63

Reliability Analysis of Allowable Pressure of Strip Footing in Cohesionless Soil
by S. M. Dasika and G. L. Sivakumar Babu ..................................... 77

Recent Development in Pile Instrumentation Technique for Prestressed Spun Concrete Piles
by F. H. Ali and L. S. Kab ................................................................. 87

Consolidation Behavior of Reconstituted Bangkok Clay
by B. Utrichorn, T. H. Sees, V. Budongsuklakorn and P. Luklumpravit .... 97

Behaviour of Composite Rigid Caisson Foundation
by M. R. Madhok and S. M. Ali Jawaid ........................................... 105

Technical Note:

Behaviour of Vertical Cuts Using Soil Nailing Techniques in Saturated Conditions
by S. Mittal, K. Singh and S. Mathur .................................................. 113
Main Papers:

Back-propagation Neural Network for Assessment of Highway Slope Failure in Taiwan
by T. L. Lee, H. M. Lin, D. S. Jeng and Y. P. Liu .......................................................... 121

Analytical Solutions for Passive Earth Pressure Considering Different Failure Mechanisms with Nonlinear Failure Criterion
by X.L. Yang and J.H. Yin ................................................................................................. 129

Geotechnical Properties of Soil-fiber Mixture as a Landfill Cover Barrier Material
by T. Harianto, Y. J. Du, S. Hayashi, D. Saetruag and Y. Nanri ...................................... 137

Secondary Compression Behavior in Three Types of Consolidation Tests
by B. Somphie, K. Arat and A. Kito .................................................................................. 145

Technical Papers

A Short-cut Method for Predicting Strength of Cement Treated Soft Bangladesh Clays and the Alteration of Other Engineering Parameters
by M. M. Rahman, M.A. Taiyeb, A. Siddique and M. K. Uddin ..................................... 159

Frequency Effect on Liquefaction using Shake Table Tests
by J. Kumar and P. Samui ................................................................................................. 169
Main Papers:

Some Cases of Fill Slope Failure and Rehabilitation in Malaysia
by T. A. Ooi ................................................................. 1

Experimental Study on Interface Mechanical Characteristics of Ecological Bags
by Z. Zhu, B. Wei, W. Wang, M. Zhu and Y. Qiu ................................................................. 11

Nonlinear Finite Element Reliability Analysis and Sensitivity Analysis of Slope Stability
by X. H. Tan and J.G. Wang ................................................................. 17

Numerical Analyses on Geogrid-Reinforced Cushion in Pile-Supported Composite Foundation
by H. M. Tan, H. L. Liu and A. Deng ................................................................. 25

GIS Applied in 3d Evaluation of Earthquake-Induced Site Liquefaction Potential
by H. Tung and G. X. Chen ................................................................. 31

Main Papers:

Correction of Inclinometer Readings for Movements at Tips
by B.B.C. Hsiung and R.N. Hwang ................................................................. 39

Performance of Top-Down Basement Excavation for the Singapore Esplanade Car Park
by I.H. Wong and A.T.C. Goh ................................................................. 49

2-D and 3-D FEM (idealisation of Soil Nailed Walls
by T.S. Ann and V.J. Balaji ................................................................. 61

Geotechnical Observations of Construction of a Large Shallow SCL Tunnel in Soft Ground
by K.H. Goh and R.J. Mair ................................................................. 67

Evaluating Performance of Diaphragm Walls by Wall Deflection Paths
by B.B.C. Hsiung and R.N. Hwang ................................................................. 81

Estimation of 3-D Greenfield Settlement around Deep Excavation from 2-D Finite Element Analysis
by D. Hallm and K.S. Wong ................................................................. 91

Three Dimensional Finite Element Modelling of a NATM Tunnel

Geotechnical Engineering for TBM Tunnelling in Soft and Mixed Ground
by J.N. Shirlaw and S. Boone ................................................................. 117

A Review of Ground Treatment Options, Issues and Concerns for Deep Excavations
in Singapore’s Kallang Formation
by N. Osborne ................................................................. 127

Three-Dimensional Analysis of Strut Failure for Braced Excavations in Clay
by A.T.C. Goh and K.S. Wong ................................................................. 137
